Report on “PULSE POLIO IMMUNIZATION CAMP”
(19th JANUARY 2020)

NCC (Army) cadets of Sri Venkateswara College of Engineering, Sriperumbudur participated in Pulse Polio Immunization camp under the guidance of ANO Capt. Dr. A. Bhaskaran on 19th January 2020 to 21st January 2020. Around 23 cadets had participated in this camp.

Around 0730 hrs the polio camp was started.

Poliomyelitis (often called as *Polio*) is a communicable disease caused by a virus called *Polio Virus*. A person who is affected by this virus will have symptoms of fever, diarrhoea and muscle weakness. The infected person will get back to normal life within few weeks but it will not stop there. After some days or months or years, post-polio Syndrome will occur which finally lead to death. Children less than **5 years of age** are easily affected and either they die, or they live as physically disabled. India is free from polio, but the disease persists in some countries and it may come back, hence ensure every child under 5 years of ages gets polio drop every time.

Around 0750 hrs we collected the vials and learnt the procedure to vaccinate the children. We gave vaccination to 300 children before lunch and 100 children after lunch.

Around 1530 hrs the polio camp was concluded.
