

Sri Venkateswara College of Engineering

(AUTONOMOUS-AFFILIATED TO ANNA UNIVERSITY)

Department of Computer Science and Engineering

One week online STTP on Current trends and tools for Web development

Register at : <https://forms.gle/rWRChEorT9CaVMgw5>

DAY 1: 21/07/2020

Web Designing Using ANGULAR

by Mr. D. SANJAY,
Senior Structure
Engineer,
IBM, Chennai.

Timing : 5pm-6pm

Day 2: 22/07/2020

REACT NATIVE and its Applications

by Mr. D. SANJAY,
Senior Structure
Engineer,
IBM, Chennai.

Timing : 5pm-6pm

DAY 3: 23/07/2020

**Business Process Management
using PEGA**

by Mr. RENUYBALAN,
Team Lead,
CTS, Chennai.

Timing : 5pm-6pm

DAY 4: 24/07/2020

Web Development Using nodeJS

by Mr. Karthic,
System Analyst,
Inapp Information
Technologies Pvt.Ltd.
Trivandrum, Kerala

Timing : 5pm-6pm

DAY 5: 25/07/2020

Java, SpringBoot

by Dr. T. Ruse,
Associate Consultant,
WIPRO, Chennai.

Timing : 5pm-6pm

Chief Patron

Prof. M. Sivanandhan
Secretary, SVCE

Patron

Dr. S. Ganesh Vaidyanathan
Principal, SVCE

Convenor

Dr. R. Anitha
HoD/CSE

Coordinators

Ms. S. Poorani AP/CS
Ms. S.U.Muthunagai AP/CS
Ms. R. Iyswarya AP/CS

Free Registration | E-certificate will be provided

Day 1 (21/7/2020) - Web Designing using Angular

The Department of Computer Science and Engineering, Sri Venkateswara College of Engineering conducted a One week Online STTP on Current trends and tools for Web Development .

Day 1 started by inviting Mr.D.Sanjay Senior Structure Engineer, IBM,Chennai by Dr.R.Anitha HoD/CS. The Session started with the introduction on angularjs and its importance in web designing.

AngularJS is one of the most sought-after JavaScript MVC frameworks. It's a structural framework for creating dynamic web applications by extending HTML capabilities. Features like data binding and dependency injection makes it easier to develop apps with less code. The speaker given hands on training on how to get start with creating an AngularJS web application and implement the sign-in functionality and user authentication against the back end application. Also he take up to the next level by implementing validations, sign-up functionality, and some other features.

Day 2 (22/7/2020) - REACT NATIVE and its Applications

Day 2 started with Mr.D.Sanjay Senior Structure Engineer, IBM,Chennai on REACT NATIVE and its Applications. The Session started with the basics of React and JavaScript knowledge and discussed some concepts of functional programming, and how to use in mobile applications. Since JavaScript world is moving forward, the importance of EC6 syntax has been discussed.

React Native is like React, but it uses native components instead of web components as building blocks. So to understand the basic structure of a React Native app, you need to understand some of the basic React concepts, like JSX, components, state, and props. If you already know React, you still need to learn some React-Native-specific stuff, like the native components.

The speaker given hands on session on React Native, like how to build mobile apps using only JavaScript. It uses the same design as React, and let to compose a rich mobile UI from declarative components. With the help of React Native, how to build a mobile web app, HTML app, hybrid app has been discussed also elaborated to how to build a real mobile app that's indistinguishable from an app built using Objective-C or Java. React Native uses the same fundamental UI building blocks as regular iOS and Android apps.

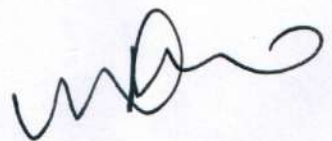

Day 3 (23/7/2020) - Business Process Management using
PEGA

Day 3 started with Mr.B.ENIYABALAN Team Lead, CTS, Chennai, on PEGA tool. The Session started with the introduction on Pega that developed on Java and how it uses OOP concepts, in a unified Business Process Management (BPM) system,. The system allows companies to increase digital process automation and improve customer experience.

Business process management (BPM) is a methodology to manage processes and workflows in an organization. The goal of BPM is to increase efficiency, performance, and agility in the day-to-day operations of a business. BPM has been widely adopted by organizations and is essential for any enterprise businesses that want to be competitive in today's marketplace. For example, the world's leading airlines utilize BPM to manage flight schedules and terminal operations.

The Hands on Session started with the following modules:

1. Application Design -Creating new applications, Enterprise Class, Rule Sets
2. Case Design/Process Design- Parallel Processing
3. Data Model Design- Data values and Access patterns
4. Decision Design- Decision Management and Components.
5. User Interface Design- User Portal Customization.

Day 4 (24/7/2020) - Business Process Management using

PEGA

Day 4 started with Mr.C.KARTHIC System Analyst Inapp Information Technologies Pvt,Ltd., Trivandrum,Kerala. on Web Development using nodeJS. The Session started with the introduction on nodeJS, it is an open-source and cross-platform JavaScript runtime environment. Node.js runs the V8 JavaScript engine, the core of Google Chrome, outside of the browser.

A Node.js app is run in a single process, without creating a new thread for every request. Node.js provides a set of asynchronous I/O primitives in its standard library that prevent JavaScript code from blocking and generally, libraries in Node.js are written using non-blocking paradigms, making blocking behavior the exception rather than the norm.

The speaker also elaborated on Node.js performance on I/O operation, like reading from the network, accessing a database or the filesystem, instead of blocking the thread and wasting CPU cycles waiting, and how Node.js will resume the operations when the response comes back.

This allows Node.js to handle thousands of concurrent connections with a single server without introducing the burden of managing thread concurrency, which could be a significant source of bugs.

The speaker gave hands on training frontend dev-ops, like how to write JavaScript for the browser and the coding on server-side in addition to the client-side code without the need to learn a completely different language.

Day 5 (25/7/2020) - Java, SpringBoot

Day 5 started with Dr.T.RUSO Associate Consultant, WIPRO,Chennai on Java Springboot. The Session started with the introduction on Java Springboot, it is an open source Java-based framework used to create a micro Service. It is developed by Pivotal Team and is used to build stand-alone and production ready spring applications.

Spring Boot is easy to create a stand-alone and production ready spring applications using Spring Boot. Spring Boot contains a comprehensive infrastructure support for developing a microservice and enables you to develop enterprise-ready applications that you can “just run”.

The speaker discussed on working strategies of Spring Boot Application - class contains SpringApplication annotation. This class should have the main method to run the Spring Boot application. SpringApplication annotation includes Auto- Configuration, Component Scan, and Spring Boot Configuration.

The speaker gave hands on training on the following modules:

- Create stand-alone Spring applications
- Embed Tomcat, Jetty or Undertow directly (no need to deploy WAR files)
- Provide opinionated 'starter' dependencies to simplify your build configuration
- Automatically configure Spring and 3rd party libraries whenever possible
- Provide production-ready features such as metrics, health checks, and externalized configuration
- Absolutely no code generation and no requirement for XML configuration

An One week Online Short Term Training Program on Current trends and tools for Web Development ended with feedback from the participants, and Question and Answers session, followed by thanks note given by Dr.R.Anitha HoD/CS and Ms.S.Poorani AP/CS, MS.S.U.Muthunagai AP/CS, MS,R.Iyswarya AP/CS about the eminent speakers and the participants.

SRI VENKATESWARA COLLEGE OF ENGINEERING

(An Autonomous Institution – Affiliated to Anna University)

Pennalur, Sriperumbudur- 602117, Chennai, Tamilnadu.

CERTIFICATE OF PARTICIPATION

This is to certify that Mr. S. ELANGO of Nandha Engineering College has participated in the One week Industry – Oriented Online STTP on “Current Trends and Tools for Web Development”, Organized by Department of Computer Science and Engineering, Sri Venkateswara College of Engineering held from 21st July 2020 to 25th July 2020 and topics covered on Web Development using:

- ANGULAR JS
- PEGA
- JAVA SPRINGBOOT
- REACT NATIVE
- NODE JS

Ms. S. POORANI

Asst. Prof / CSE - COORDINATOR
