Reflection Report - Webinar on “Web Scraping with Python”

The Department of Computer Science & Engineering, Sri Venkateswara College of Engineering organized a Webinar on “Web Scraping with Python” on 10th February, 2021 through Google Meet. The objective of the webinar was to explore the key features of web scraping using python. The target audience for the webinar are the students and staff working on Social Network analysis and Web Analytics having basic knowledge of programming as prerequisite. The guest speaker was Mr. Palani Karthikeyan, Technical Consultant, Krosun Labs, Bangalore.

The event started with lighting of e-Kutthuvilakku by the guest speaker followed by prayer song by Ms. R. Madhumitha, I Year Student. The welcome address was given by Ms. E. Rajalakshmi, AP/CSE and the introduction to chief guest was by Ms. R. Gayathri, AP/CSE. Dr. R. Anitha, HoD/CSE delivered a short note on Web Scraping.

The webinar started around 6.40 P.M and came to an end by 8.10 P.M. The entire session was roofed by the interesting lecture given by Mr. Karthikeyan. He started his lecture by introducing Web scraping and its applications using PPT. He demonstrated the scraping using “BeautifulSoup” class in Python programming (Anaconda) as a base for scraping the websites. He demonstrated the webscraping concepts like job search in Monster.com through programs and a case study – scraping in Amazon.com for price list. He ended up the lecture by summarizing the concepts and the applications in webscraping.

Mr. Karthikeyan answered very patiently to the queries of the students and the faculty members. The webinar reached around 85-members of Sri Venkateswara College of Engineering and colleges in Chennai, Madurai and Bangalore.

The guest was honored by Dr. R. Anitha, HOD/CSE and the vote of thanks was given by Ms. R. Gayathri, AP/CSE. The guest felt very happy for the opportunity given to him at SVCE.

The webinar provided a demo on collecting structured web data in an automated fashion like price monitoring, news monitoring, market research. The participants gained knowledge on automated data extraction from web to develop mining applications using Python.

AGENDA

- Welcome address
- Introduction of Chief Guest
- Short note by HOD
- Special talk by Chief Guest
- Questionnaire and Feedback
- Vote of Thanks

Snapshot of the event

The screenshot shows a Zoom meeting interface. The main window displays a slide from SVCE (Sri Venkateswara College of Engineering) Department of Computer Science & Engineering. The slide title is "Webinar - Webscraping with Python" dated 10.02.2021. It features a golden lamp with a flame and the text "Kindly Light the Lamp". The Zoom interface includes a video player at the bottom with a pause button and a timer showing 0:21 / 2:04:18. A participant named "HOD CS" is visible in the top right corner.

The screenshot shows a Zoom meeting interface. The main window displays a slide from Krosium labs with the title "Web scraping". The slide content is as follows:

Web scraping

- **Web scraping** is the process of collecting and parsing raw data from the Web.
- data science, business intelligence, and investigative reporting, can benefit enormously from collecting and analyzing data from websites.
- Collecting data from websites using an automated process is known as web scraping.

The Zoom interface includes a video player at the bottom with a pause button and a timer showing 0:21 / 2:04:18. A participant named "python class" is visible in the top right corner.

```
In [25]: obj=bs4.BeautifulSoup(r.content)
t=obj.find('h2',class_='title')
l=obj.find('div',class_='location')
print(t.text)

Software Developer - Journeyman

In [28]: for var in obj.find_all('h2'):
var.find('')
