### PLASTIC FREE ZONE AWARENESS PROGRAM

Waste produced by us and other creatures has to be degraded at any cause for not causing pollution to the Environment, but plastic is one such thing that has a very slow degrading rate i.e. after thousands of years it still remains the same. Plastic has a very harmful effect on the environment if we dispose or throw it without processing. Therefore, it is necessary to create a plastic-free zone in order to control pollution. To kick start this awareness, YRC SVCE unit and IChE – SVCE Student Chapter jointly organized an awareness program on this title. The event was held on 7th March 2019, at Biotech Conference Hall in SVCE with the chief guest Dr. S. Jeevanandham, Chairman, Indian Red Cross Society, Kancheepuram District. The chief guest gave a brief and intellectual talk about the importance of the plastic free zone and made the session interactive. Dr. N. Meyyappan HOD, Chemical Engineering presented a memento to the chief guest after the talk. The programme was well organised by the YRC Co-ordinators Dr.R.Govindarasu, Dr. N.R. Sheela and IChE Coordinator Ms.PG Priyadarshini and the event become a grand success.
