The Department of Information Technology organized a Webinar on "Real-time AI in Business Intelligence Applications" on 3rd June, 2020. The event started with a prayer song by III year IT student, followed by the welcome address by Dr.G.Sumathi, Prof/INT & Coordinator. The profile of the chief guest was given by Ms D. Jayanthi, AP/INT & Coordinator. Dr V.Vidhya, HoD/INT addressed the gathering and gave an introductory talk emphasizing the importance of business intelligence applications in industry perspective. She highlighted the purpose of conducting such webinars and motivated the participants to interact on the topic.

Mr. G Vivek, Senior Manager, Projects, CTS, Chennai. The main objective of webinar is to understand impact of Artificial intelligence (AI) in today's business corporations and how to automate business communication with customers without the need of human agents. Also, to know how AI provides solutions to business challenges for automated decision making and provide value to customers.

The programme highlights how the businesses can avail the benefits of AI with personalized experience based on AI-driven data insights derived from customer behavior and online purchasing patterns. Also, about how real-time help can be provided to the customers where companies can use AI-powered mobile apps to communicate with large number of customers on a real-time basis and to provide personalized services to individual customers. Different applications of artificial intelligence in business such as work automation, sales and marketing and customer services were demonstrated with case studies. Churn prediction, retail services etc. were also demonstrated with real life examples. The webinar focused on how the global business world is witnessing increasing volumes of connected devices and business data. With the massive increase in business data, corporations can no longer depend on traditional business analytics or business intelligence tools to analyze data and derive valuable business insights for better decision making and business strategies. Also, Thoughspot, a search and AI-driven analytics was demonstrated where company data can be processed in seconds and automated insights can be delivered from the tool.

Outcome of the Program:
- Knowledge on industry oriented test cases using AI in business.
- Sound understanding of AI in business intelligence with real-world examples.
- Ability to work with Thoughspot, an AI driven analytics tool.
