REPORT ON FOUR DAYS ONLINE WORKSHOP ON “WEB DEVELOPMENT USING JAVA”

Date: 10/06/2020 - 13/06/2020

Time: 8.30am - 10am

Objectives

- To learn about the protocols involved in Internet technology.
- To learn about the use of Java Technologies in Web development.
- To develop own Web Page and how to host own web site on the Internet.
- To understand the working concept of server-side java applications.

About the programme

The Department of Information Technology of SVCE in association with IEEE Student Branch organized Four Days online workshop on “Web development Using Java” from 10th June 2020 to 13th June 2020. Dr.V.Vidhya, HoD/INT, Students and Faculty members of SVCE and other colleges participated in the workshop. Dr.V.Vidhya, HoD/INT welcomed all the participants. The introductory speech about the speaker was rendered by Ms.G.Sangeetha, AP/INT. The speaker for the Workshop was Mr.S.S.Rahul,(IT Aluminous) Sr. Member Technical Staff, Gofrugal Technologies.

The purpose of the workshop was to make the participants very clear about the basics of Web development Using Java Technologies. The Internet is the backbone of the Web, the technical infrastructure that makes the Web possible. At its most basic, the Internet is a large network of computers which communicate all together. The first session of the workshop focused on “How internet works”.

The speaker started the session by explaining the basics of Internet and Web followed by how it works and demonstrated the same. He explained different HTML tags and showed demo on that. He explained well about web pages, websites, web servers, and search engines. The basics of the Internet were explained with the introduction of DNS, Public IP address, Local IP address, IPv4, IPv6, and URL.

The Second day session started with Port forwarding concepts. The speaker, clearly explained how the clients and servers are protected from unauthorized access. He described about the port numbers and its usage with real time examples. Then, he described the theoretical concepts like, stateless protocol, statefull protocol, HTTP protocol, Multithreading Static and Dynamic Web pages are explained and demonstrated the same.

The third day session was started with Client Server architecture. He explained how the client is able to get the response from the server with HTTP protocols. The communication protocol HTTP, its methods

were explained with examples. And also, the basics of HTML, the details of the key Java EE technologies and how to leverage the strengths of each with special focus on Servlets and JSP were taught and demonstrated.

The Fourth day session was coding session. He demonstrated how the web page is created and can be published with HTML, JSP and Servlets. All these demonstrations were done with Apache Netbeans 12.0 and the standard application server Tomcat. Overall, the workshop was quite interactive, interesting and meaningful one.

The Webinar came to an end with the Vote of Thanks by Ms.A.Indumathi, AP/INT, Webinar Coordinator. Dr.V.Vidhya thanked the speaker for making wonderful presentation and hands-on and all the participants for their active participation. 22 internal students, 2 internal Faculty, 26 external students (Total:50) participated in the workshop.

Based on the Feedback, the following outcomes were measured

- Knowledge on the basics of web page development.
- Understood the concepts of static and dynamic web pages.
- Able to develop a dynamic web-page
