"Deployment of machine learning models in AWS using FLASK framework"

A Report

Date: 04.07.2020 **Time:** 11.00 am to 12.30 pm

Resource Person: Mr. K B Sundharakumar

Assistant Professor, Department of Information Technology,

SSN College of Engineering

Objectives:

- Understand the basics of Machine Learning.
- Explore about FLASK framework and the supporting tools and libraries.
- Learn about deployment of Machine learning models in AWS using FLASK framework.
- Explore about models from conceptualization to production.
- Explore few real-world use cases.

The Department of Information Technology organized a Webinar on "Deployment of machine learning models in AWS using FLASK framework" on 4th July, 2020. The event started with a prayer song by III year IT student, followed by the welcome address by Ms.D.Jayanthi, AP/INT & Coordinator. The profile of the chief guest was given by Ms N. Devi, AP/INT & Coordinator.

Dr V.Vidhya, HoD/INT addressed the gathering and gave an introductory talk emphasizing the importance of Machine Learning in industry perspective. She highlighted the purpose of conducting such webinars and motivated the participants to interact on the topic.

Mr. K B Sundharakumar, Assistant Professor, Department of Information Technology, SSN College of Engineering was the resource person for the webinar. The main objective of webinar is to understand how to deploy machine learning models in Amazon Web Services (AWS) using FLASK framework which is a web micro framework of python. Also, to provide in-depth practical knowledge to the participants on ML models using FLASK framework with example case studies.

About 77 participants attended the webinar and the program highlighted how the businesses can derive AI-driven based data insights and the steps for deploying models in AWS. The speaker delivered some basics of machine learning, introduction to Amazon Web Services (AWS) and introduction to Flask framework. The tools, libraries and the technologies supported by Flask to build a web application were demonstrated to the participants. The webinar focused on demonstration of steps to build a model and other key variables and, how to create an account in AWS and to launch the instance in AWS. Also, the steps to install all the packages to run the file in AWS box and to test the output in the browser were illustrated to the participants for sample case study. The configuration settings for enhancing the security in AWS and Flask were demonstrated. The program highlighted how ML models take from conceptualization to production that is typically complex and time-consuming. And how to manage large amounts of data to train the model, choose the best algorithm for training it, manage the compute capacity while training it, and then deploy the model into a production environment.

In the valedictory function, Ms. P. Leela Rani, AP/INT & Coordinator felicitated the chief guest and motivated all the participants to work towards emerging industrial perspectives. Mr. A R Guru Gokul, AP/INT & Coordinator delivered the vote of thanks. Before the end of the program, few participants came forward and appreciated the efforts taken for the conduct of the program. They expressed that the lecture sessions and the practical sessions were very much useful and helped them to acquire practical knowledge in deployment of ML models in AWS using FLASK framework.

Outcome of the Program:

Participants were benefited and gained knowledge on,

- 1. Python environment setup and FLASK basics.
- 2. Using API to integrate our model into applications and systems.
- 2. Creating and deploying a machine learning model in AWS.
- 3. Creating API using Flask for an example case study.
