## Brief Report of the Webinar

The webinar started with a welcome note and the introduction of the speaker to the Participants by Dr.R.Kumutha, Professor & Head/ Civil Engineering, who is the Convenor of this Program. Dr.G.Indu Siva Ranjani outlined the different types of light weight concrete such as Light weight aggregate concrete, no fines concrete and aerated concrete. The various methods of production of aerated concrete were discussed in detail in her lecture with a special focus on foam concrete and gas concrete. The effect of surfactant and the quality of foam production on the quality of foam produced was emphasized to the participants. Use of different foaming agents and their effect on the strength was better explained through the already proven studies by research.

Various projects in which light weight concrete was successfully applied were also indicated by Dr.Indu Siva Ranjani during her lecture. The nature of foamed concrete, its composition and properties and how it could be specified for use in civil engineering works were also described in detail.

The session ended with a vote of thanks delivered by Dr.R.Kumutha, Professor & Head/ Civil Engineering. The participants also had appreciated the webinar.
