A Reflection Report

Two day Virtual Workshop
on
Top Trending Languages for Web Developers

Organized

by

Department of Computer Science and Engineering

03/02/2022 - 04/02/2022

Coordinators

1. Ms.S.U.Muthunagai AP/CS
2. Ms.S.Poorani AP/CS
3. Ms.R.Iyswarya AP/CS

Two day Virtual Workshop
on
Top Trending Languages for Web Developer

by

Mr. D. Sanjay, CEO, SM Enterprises, Chennai

Meeting Invite Link: https://meet.google.com/qeq-bmwf-bdg

Date: 03/02/2022 - 04/02/2022

Coordinators

1. Ms.S.U.Muthunagai AP/CS
2. Ms.S.Poorani AP/CS
3. Ms.R.Iyswarya AP/CS

Two day Virtual Workshop
on
Top Trending Languages for Web Developer

Agenda

Day 1:

➢ How to leverage frontend with Vue JS
➢ LS Nodejs the Ultimatum

Day 2:

➢ Architecture and Design Concepts
➢ Hands-on Training

Sri Venkateswara College of Engineering
Department of Computer Science and Engineering
Top Trending Languages for Web Developer
Date: 03/02/2022-04/02/2022

ENNALUR

Top Trending Language for Web Developers

The Department of Computer Science and Engineering, Sri Venkateswara College of Engineering virtually conducted a Two-day Virtual Workshop on Top Trending Language for Web Developers on 03.02.2022 and 04.02.2022..The session started by inviting our chief guest Mr.D.Sanjay Chief Executive Officer, S.M.Enterprises, Chennai by Ms.S.U.Muthunagai Asst.Prof/CSE.

 The Session started with the introduction on Nodejs and Vue js and its importance in web designing, the lecture about front end design on Vue js explained with the key points like, Vue. js is a progressive framework for JavaScript used to build web interfaces and one-page applications.Its Not just for web interfaces, Vue. js is also used both for desktop and mobile app development with Electron framework. The main difference of Vue js and react is, React requires solid JavaScript skills, while Vue. js is more oriented to novice developers. Similar to React, Vue. js enables writing with JSX, but the components are written with HTML templates.Further speaker elaborated about the various features can available with VueJS like Virtual DOM , Data Binding, Components, Event Handling, Animation/Transition, Computed Properties, Templates, Directives, Watchers, Routing, Lightweight, Vue-CLI.

Further speaker explained about the concepts of Nodejs and elaborated about the fundamentals of Node and then to build a fullstack web app development. Node.js is a compelling JavaScript-based platform that's built on Google Chrome's JavaScript V8 Engine. It is used to develop I/O intensive web applications, such as video streaming sites, single-page applications, online chat applications, and other web apps. Large, established companies and newly-minted startups alike (Netflix, Paypal, NASA, and Walmart, to name a few) use it often.

Day2 speaker elongate the session with Node.js, he explained Nodejs, it is open-source and completely free, and thousands of developers around the world use it. The platform brings plenty of advantages to the table, making it a better choice than other server-side platforms, like Java or PHP.

Started with the architecture and design concepts of nodejs and vuejs. He detailed about the Node. js uses in a "Single Threaded Event Loop" architecture to handle multiple concurrent clients. Node. js Processing Model is based on the JavaScript event-based model

along with the JavaScript callback mechanism.Further how design pattern does nodejs use and its behavioural requirement ,like how singletons are probably the most common Node. js design patterns among the modules in NPMnpm is a software registry that serves over 1.3 million packages. npm is used by open source developers from all around the world to share and borrow code, as well as many businesses.

Also Speaker extented his lecture on how to facilitate Vue.js API, since it is a heavily influenced   by AngularJS, KnockoutJS, Ractive.js and Rivets.js.   Despite   the similarities,Vue.js offers a valuable alternative to these existing libraries by finding a sweetspot between simplicity and functionality.Even if you are already familiar with some of these terms, it is recommended that you go through the following concepts overview because your notion of these terms might be different from what they mean in the Vue.js context.

At the end of the workshop, Dr.R.Anitha Professor and Head/CSE, gave special thanks to speaker for sparing good time and enlightening two days virtual workshop in theoretical and hands on session on nodejs and vuejs concepts.

The workshop ended with feedback from the participants, and followed by vote of thanks.

Dr.R.Anitha
HoD/CSE
