Dear Sir/Ma'am,

Please find the zoom link for the webinar on cervical cancer below:

Join Zoom Meeting

<https://zoom.us/j/96351461244?pwd=aVhpMnhHaVpCNS9JdUNzM0c5R0F3QT09>

Meeting ID: 963 5146 1244

Passcode: 361081

Here are a few things you should know about Cervical Cancer and the reason why it's important to be informed.

- In India, cervical cancer contributes to approximately 6–29% of all cancers in women.
- India alone accounts for one-quarter of the worldwide burden of cervical cancers.
- It is one of the leading causes of cancer mortality, accounting for 17% of all cancer deaths among women aged between 30 and 69 years.
- It's estimated that cervical cancer will occur in approximately 1 in 53 Indian women during their lifetime compared with 1 in 100 women in more developed regions of the world.

The stats are alarming despite cervical cancer being the most easily preventable gynecologic cancer.

The reason? Lack of awareness about vaccination and screening.

As mentioned in our last email, **Apollo Shine** Foundation and **Apollo Proton Cancer Centre** have joined hands to create cancer awareness and encourage screening amongst the student and teacher community in India.

This webinar is exclusively organized for the women principals and teachers of our **Apollo Shine** institutions.

We are looking forward to your participation in full strength and benefit from this. Kindly RSVP 72991 23927

Warm regards,  
Kavitha Ayyer  
Sr. Relationship Manager

### **Reflection Report**

The day started with the prayer song. Dr. R. Anitha Prof. and Head/CS welcomed the speaker. This webinar is exclusively organized for the women principals and teachers of our Apollo Shine institutions.

- The speaker Dr. Kaavya has discussed few things about Cervical Cancer and the reason why it's important to be informed.
- In India, cervical cancer contributes to approximately 6–29% of all cancers in women.
- India alone accounts for one-quarter of the worldwide burden of cervical cancers.
- It is one of the leading causes of cancer mortality, accounting for 17% of all cancer deaths among women aged between 30 and 69 years.
- It's estimated that cervical cancer will occur in approximately 1 in 53 Indian women during their lifetime compared with 1 in 100 women in more developed regions of the world.
- The stats are alarming despite cervical cancer being the most easily preventable gynecologic cancer.
- The reason? Lack of awareness about vaccination and screening.
- Apollo Shine Foundation and Apollo Proton Cancer Centre have joined hands to create cancer awareness and encourage screening amongst the student and teacher community in India.

Queries from the participants were raised and were clarified. Feedback from the participants is received.

Dr. Anitha  
HoD/CSE
