BROCHURE

OBJECTIVE OF WORKSHOP

The adoption of chatbots and virtual assistants, coupled with the integration of artificial intelligence and machine learning technology, has revolutionized the healthcare industry. In many ways, chatbots have become ubiquitous, providing a more optimized user experience through digital means. The healthcare industry has already benefited immensely from this technology, namely through greater access to valuable services and information, more accuracy in determining what care patients require, and reduced costs for patients and providers alike.

The objective of this workshop is to inspire participants to further explore the topic on their own, or to illustrate and promote actual processes
