A Reflection Report

Five Days STTP

on

Future Technologies: Insights and Challenges

Organized

by

Department of Computer Science and Engineering

20/02/2023 - 24/02/2023

Coordinators

1. Ms.S.U.Muthunagai ASP/CSE
2. Dr.M.S.Girija AP/CSE
3. Ms.S.Poorani AP/CSE
4. Ms.R.Iyswarya AP/CSE
5. Ms.Rupa Kesavan AP/CSE

Convener

Dr.R.Anitha Prof & Head/CSE

Forwarded to
Principal:

20/3/23

Five Days STTP
on
Future Technologies: Insights and Challenges

Contents

- Invitation
- Registration of the participants
- Day Wise Report
- Photographs
- Day Wise Feedback
- Sample Certificate

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

STTP on Future Technologies: Insights and Challenges

20th FEB TO 24th FEB 2023

Day 1 Quantum Computing for NLP :

Dr. R. Prasanna Kumar , Associate Professor / CSE, Amritha University, Chennai

Day 2 Role of IoT in Sustainable development :

Dr. C. Muralidharan , Assistant Professor, SRM Institute of Science and Technology, Kattankulathur

Day 3 Block Chain and Cryptocurrency Technologies:

Dr. N. Poornima , Assistant Professor, School of Computer Science and Engineering, VIT , Vellore

Day 4 Machine Learning :

Dr. A. V. Kalpana, Assistant Professor, SRM Institute of Science and Technology, Kattankulathur

Day 5. Security for Asset Management :

Ms Hema Bhaskar, Team Lead, CTS, Chennai

Organizing Committee

Ms. S. U. Muthunagai, Associate Professor / CSE, SVCE
Dr. M. S. Girija, Assistant Professor / CSE, SVCE
Ms. S. Poorani, Assistant Professor / CSE, SVCE
Ms. R. Iyswarya, Assistant Professor / CSE, SVCE
Ms. Rupa Kesavan, Assistant Professor / CSE, SVCE

Convenor

Dr. R. Anitha, Professor & Head / CSE, SVCE

Timing:

6.00 PM to 7.30 PM

Participants:

- Students
- Faculty
- Research Scholars

Advisory Committee

Dr. M. Sivanandham, Secretary, SVCE
Dr. S. Ganesh Vaidyanathan, Principal, SVCE

Registration Link

<https://forms.gle/Y8Q522zmPfbQ4Qa7>

Mode of Delivery:

Google Meet

Sri Venkateswara College of Engineering
(Autonomous - Affiliated to Anna University

Day 1: Quantum Computing for NLP

OBJECTIVES:

The objective of this session is to learn about the basics of quantum computing in Natural language Processing and the mathematical computation models on quantum circuits using various gate operations.

Quantum Natural Language Processing (QNLP) - is the application of quantum computing to natural language processing (NLP). It computes word embeddings as parameterised quantum circuits that can solve NLP tasks faster than any classical computer. QNLP is a recent application of quantum computing that aims at representing sentences meaning as vectors encoded into quantum computers.

INSIGHTS:

The event started with the introduction of QNLP by Dr.R.Anitha HoD/CSE, she welcomed our chief guest Dr. R. Prasanna Kumar Chairperson and Associate Professor, at the School of Computing, Amrita Vishwa Vidyapeetham, Chennai. Followed by the Speaker started the session by giving an overview of QNLP, he stated that QNLP is a quantum-native which means that the language structure wants to run itself on a quantum computer rather than a classical computer because a natural model of language is equivalent to a natural model utilized to describe quantum mechanical phenomena. Also he explained about the coherent structure that helps in navigating based on the requirements. Further he cultivate in-depth knowledge on the following topics: Introduction to Quantum Computing, Basics of Quantum Machine Learning, Diagrammatic Quantum Theory, Quantum Natural Language Processing

OUTCOME:

Benefit of the program is that the participants will be able to explore the quantum computing concepts in Natural Language processing applications and also they gained familiarity with potential applications of QNLP and its future research directions.

Day 2: Role of IoT in Sustainable Development

OBJECTIVES:

The objective of the session is to learn the importance of IoT applications for a sustainable environment. To learn the significance of Smart devices that can be applied in industry 4.0 and above, from smart manufacturing to healthcare also aims to achieve the efficiency and optimization operations.

Internet of Things (IOT) - The next wave that the world will experience is the Internet of Things (IOT). Mobile phones, computers, and other linked gadgets are the norm today, and connected objects will rule the future (Eg: home appliances, vehicles, lamp-posts, personal accessories, your pets, industrial equipment and everything which you use in day-to-day life).

INSIGHTS:

The event started with the introduction of IoT by Dr.R.Anitha HoD/CSE, she welcomed our chief guest Dr. C. Muralidharan Assistant Professor, SRM Institute of Science and Technology, Kattankulathur. With this, the Speaker started the session by giving a framework for a preliminary evaluation of the impact of IoT projects across sustainable development areas, mapping of IoT projects to case studies that helps to visualize how they address and compare with other frameworks. IoT will undoubtedly become more intuitive and user-friendly as new technologies, like AI, but manufacturers will primarily need to focus more on safeguarding their connected devices since the risk to data will also rise. Despite all of these trends and forecasts, the future is undoubtedly one to look forward to because it is so promising.

OUTCOME:

Benefit of the program is that the participants were expected to see that increasing IoT business use cases, provides a foundation to support many core business activities across industries and it provides an IoT deliver greener results when compared to other technical products.

Day 3: Blockchain and Cryptocurrency

Technologies

OBJECTIVES:

The objective of the session is to give exposure towards one of the emerging concepts using block chain and technologies behind crypto currency. Also to give insights on how the blockchain technology may affect the wider social, economical, political, cultural domain.

Blockchain and Cryptocurrency - A peer-to-peer network's entire transactions are recorded in a blockchain, which is a decentralized ledger. Participants can confirm transactions using this technology without the requirement for a central clearing organization.

INSIGHTS:

The event started with the introduction of IoT by Dr.R.Anitha HoD/CSE, she welcomed our chief guest Dr. N. Poornima Assistant Professor, School of Computer Science and Engineering, VIT , Vellore. With this, the Speaker started the session about blockchain usage, one can securely transfer money to another person without going through a bank or other financial institution. Blockchain technology is frequently referred to as distributed ledger technology in the financial services sector. Also the speaker explained about public blockchains, private blockchains, consortium blockchains and hybrid blockchains. Blockchain aims to make it possible to share and record digital information without editing it.

OUTCOME:

The participants will be able to understand the importance of trust networks and challenges in Bitcoin Technology. Additionally, it raises awareness of Blockchain technology and the ways in which it can be applied to the processing of cryptocurrency transactions on a public

Engineering

35 Years of Excellence

ledger.

Day 4: Machine Learning

OBJECTIVES:

The objective of this session aims to test the competence of the students in Machine learning and their ability to solve a problem through the ML algorithms and methodologies.

Machine Learning - process of creating systems that learn and develop on their own through carefully designed programming is known as machine learning. Designing algorithms that automatically assist a system in gathering data and using that data to learn more constitutes the ultimate goal of machine learning. Systems are anticipated to analyze the data for patterns and use those patterns to autonomously make important decisions.

INSIGHTS:

The event started with the introduction of IoT by Dr.R.Anitha HoD/CSE, she welcomed our chief guest Dr. A. V. Kalpana Assistant Professor, SRM Institute of Science and Technology, Kattankulathur. With this, the Speaker started the session about machine learning. It involves giving systems a brain, a human-like intellect, and the ability to think and behave like humans. Existing machine learning models in the real world are capable of performing the following tasks like separating legitimate communications from spam, as seen in Gmail, fixing spelling and grammar errors, as shown in autocorrect, Machine learning has also enabled the development of design, blockchain usage, one can securely transfer money to another person without going through a bank or other financial institution.

OUTCOME:

This event helps the students to have hands-on experience in solving a ML problem and also tests their competence against the accuracy of their solution. Students gained the knowledge of Applying the algorithms to a real problem, optimize the models learned and report on the expected accuracy that can be achieved by applying the models.

Day 5: Security for Asset Management

OBJECTIVES:

The objective of this session aims to create awareness on security issues and challenges in concern to infrastructure networks and the connected resources.

Security and Asset Management - The day-to-day management of a wealth portfolio is known as asset management. An investment manager typically serves as its leader. Building a portfolio of investments is a component of asset management. This entails evaluating risks, identifying opportunities, and creating a comprehensive plan for achieving a number of financial goals.

INSIGHTS:

The event started with the introduction of Security for Asset Management by Dr.R.Anitha HoD/CSE, she welcomed our chief guest Mrs. Hema Bhaskar, Senior Infra. Architect (Engagement Delivery Lead) at Cognizant Technology Solutions - Chennai. With this, the Speaker started the session on how to handle Infrastructure and Asset management tools like- Microsoft Project, Visio, ServiceNow , BMC Remedy, ServiceNow, Symphony, Fresh Service, Discovery Tools – DDMI, Marimba, SCCM, MidServer, InTune, Airwatch, JAMF, Systrack, BigFix, Solarwinds. Also extends her session on design, build and implement IT infrastructure solutions, Operations Manager handling problem and Change Management in Operations Management, the Business analysts use industry analysis as a tool for market analysis to comprehend an industry's competitive dynamics.

OUTCOME:

This event helps the students gain the knowledge of market entry strategies based on the analysis of technology and industry trends assessment to identify which stage an industry is currently in, whether it is still growing and there is scope to reap benefits or has reached its saturation point.

STTP- Future Technologies: Insights and Challenges (2023-02-22 18:07 GMT+5:30)

Bitcoin Scripts

- Bitcoin software (also known as Bitcoin Core) is not actually written in Bitcoin Script. .
- The original implementation of the Bitcoin software was written in C++. Since then, additional implementations have been written in Python, Java, and Go.
- Thus, for the version of the Bitcoin software written in Go, the Bitcoin Script inside it is also implemented using Go.

DAY 4: Machine learning

The screenshot shows a web browser window displaying a video player. The video player is showing a presentation slide titled "Data Science Process". The slide content includes a flowchart of the data science process and a list of roles.

Data Science Process

The flowchart shows the following steps in a sequence:

- Collection
- Cleaning
- Exploratory Data Analysis
- Model Building
- Model Deployment

Below the flowchart, the following roles are listed:

- Data Engineers
- Data Analysts
- Machine Learning Engineers
- Data Scientists

The video player interface shows the video is at 9:19 / 1:28:02. The browser tabs include "STTP-Future Tech", "Future Technologies", "Firewall Authentication", "short synonyms - Go", "Top Engineering Coll...", and "drive.google.com/file/d/1GL_YbqDV68CX1Md7EwmFKVZ2olPSF/view".

35 Years of Excellence

DAY 5: Security for Asset Management

The screenshot shows a Zoom meeting interface with the following elements:

- Recording:** A button in the top left corner.
- Presenter:** A notification that 'Hemanth Bhaskar is presenting'.
- Agenda:** A central panel divided into two columns:
 - Infra. Security Management:**
 - What is Security Management
 - Types & Levels of Risk Management
 - Security Management Architecture
 - Security Management with Check Point
 - What is Security Management in the Cloud?
 - Types of PaaS Security Solutions
 - Common IaaS Security Issues
 - Impact of DevSecOps on Infra. Security
 - Infra. Asset Management:**
 - ITAM Overview & Objectives
 - IT Assets - What Are They?
 - ITAM - Conceptual Model
 - Accountability Management
 - Asset Operations Management
 - Financial Management
 - Provisioning Management
 - Configuration Management
 - Application Management
 - ITAM Maturity Model
- Participants:** A grid of video thumbnails for participants: Hemanth Bhaskar, Geetha Vijayarag, Senthil Kumar R., Muthinagani S., HOD CS, Akshaya M CS, and 25 others.
- Bottom Bar:** Meeting controls including mute, video, chat, and a timer showing 4:05 PM. The meeting title is 'STTP- Future Technologies: Insights and C...'. The system tray shows the date 3/24/23.
