About PFMS

PFMS was developed using an architecture that was envisaged in 2009, and as more functionalities have been added over the last few years, along with the ever-increasing depth and width of its operations, PFMS faces challenges of scalability and performance.

The Public Financial Management System (PFMS) is a web-based online software application developed and implemented by the Controller General of Accounts (CGA), Department of Expenditure, Ministry of Finance, Government of India. PFMS started in 2009 with the objective of tracking funds released under all Plan schemes of the Government of India, and real-time reporting of expenditure at all levels of Programme implementation. Subsequently, the scope was enlarged to cover direct payment to beneficiaries under all Schemes. Gradually, it has been envisaged that digitization of accounts shall be achieved through PFMS, and beginning with Pay & Accounts Offices payments, the O/o CGA did further value addition by bringing in more financial activities of the Government of India into the ambit of PFMS.

The primary function of PFMS today is to facilitate a sound Public Financial Management System for the Government of India by establishing an efficient fund flow system as well as a payment cum accounting network. PFMS provides various stakeholders with a real-time, reliable and meaningful management information system and an effective decision support system, as part of the Digital India initiative of Government of India.

- EAT Module – is basic functionality of filing expenditure on PFMS
- TSA Module for schemes with a budget of over 500 Crores operated through the Reserve Bank of India
- CNA Module for schemes with a budget of less than 500 Crores operated through schedule commercial banks
- SNA Module for Schemes Funds for which are routed through the State Treasury.

PFMS is mandatory for all Schemes of Govt. of India. Any funding agency wanting to release grants has to mandatorily use PFMS and the recipient institution also has to use PFMS for making payments using the scheme funds.
