Based on the feedback received for curriculum and syllabus of Regulation 2018 from stake holders, necessary modifications shall be performed to elevate the curriculum so as to foster research & development, design innovative applications of technology and encourage entrepreneurship.

Feedback received from faculty confirms the strong relevance of the courses to the programme and course outcomes to the course content. Faculty stated they have used online technologies to boost participatory learning which in turn enhances the practical exposure.

Alumni emphasized the necessity of revising the curriculum to equip the student with industry readiness. Every student's professional competence and soft skills should be developed through case studies, applications, and projects. They also suggested that more courses concentrating on employability and current technological developments be included in the curriculum to encourage lifelong learning. Finally, they proposed the usage of various assessment tools.

Employers commended the inclusion of specific elective courses designed by industry. In addition, they recommended to make internships mandatory.

**Action to be taken:**

- Suggested for more industrial collaboration in the framing of curriculum and syllabus and in the teaching learning process.
- Recommended to have more focus towards mathematical modeling in courses to promote the placement opportunity of the students.
- Mandated to include value added or certificate courses in the industrial specific courses, Industry supported courses.
