10.	Overall Satisfaction on the Curriculum and Syllabus	5				
<p><b>Any other suggestions: The biggest feedback I would give is to introduce python in sem 1, instead of C. C is a hard language to grasp, for folks with no exposure to programming. Python is more natural. I would suggest bringing C and C++ out later, and keep python in Sem 1. I would also suggest introducing some group projects in the laboratory sections, and instill a sense of teamwork and collaboration in the students</b></p>

**Any other suggestions: Syllabus given for Computer Science and Engineering Under Graduate Programme is good but this can be effectively useful for students only when they get to know how these things works in real time. Teaching basics is essential but giving enough practice and real world knowledge is necessary rather being text-book oriented. The success of the programme definitely not lies in Grades or Ranks or Placement Percentage but rather lies on how much we give it to the students in order to build their career. Highly encourage students to practice coding which is the ultimate.**

1.	The curriculum addresses the Industries' current needs	3				
2.	The curriculum is oriented towards the Organization's Vision & Mission	4				
3.	The curriculum can serve the Society's requirements	4				
4.	The Curriculum and Syllabus have imparted useful knowledge needed for professional practice	4				
5.	The curriculum has provided the competency to relate theory to practice	4				
6.	Projects emphasize team building and teamwork.	3				
7.	The co-curricular activities have enhanced organizing and interpersonal skills.	4				
8.	The curriculum has instilled Professional Ethics in the students	3				
9.	The curriculum has stimulated continuous learning.	4				
10.	Overall Satisfaction on the Curriculum and Syllabus	3				
<p><b>Any other suggestions:</b> The biggest feedback I would give is to introduce python in sem 1, instead of C. C is a hard language to grasp, for folks with no exposure to programming. Python is more natural. I would suggest bringing C and C++ out later, and keep python in Sem 1.</p> <p>I would also suggest introducing some group projects in the laboratory sections, and instill a sense of teamwork and collaboration in the students</p>
